Dear Parents/Carers,

The biggest change this year in the swimming program will be that all children will need to logged online. It is important so that groupings can be organized for the first day of swimming and it also allows parents and swimming instructors to monitor all children’s progress online.

To prepare for your lessons we need to collect some information about your students and their current swimming capabilities. To collect this information, we have an online form than can be sent to parents for completion. The form will ask them a few questions that will help us gauge their child’s swimming ability so we can place them in the correct level. This online process helps us with a more accurate class allocation. If a parent/guardian is absolutely unsure about their child’s ability, they can skip the level allocation questions and we can assess on the first lesson.

Please find the student enrollment link below: cut and paste the link into the browser and fill out the template online.

Thanks Leigh Collins P.E.
