

2015 Annual Report to the School Community

Thornbury Primary School

School Number: 3889

Name of School Principal:

Shaun McClare

Name of School Council President:

Tim Bennett

Date of Endorsement:

May 5th 2016

All Victorian government school teachers meet the registration requirements of the Victorian Institute of Teaching (www.vit.vic.edu.au).

This school meets prescribed minimum standards for registration as regulated by the Victorian Registration and Qualifications Authority (VRQA) in accordance with the Education and Training Reform Act 2006, inclusive of those schools granted an exemption by the VRQA under the 'Student enrolment numbers' and/or 'Curriculum framework for schools - languages program' minimum standards until 31 December 2015.

About Our School

School Context

Thornbury Primary School is a thriving, community minded school located in the inner northern suburbs of Melbourne. Established in 1915, it has a long, proud tradition of education F-6 children from local and neighbouring suburbs of Thornbury. Students come from diverse economic, educational, social and cultural backgrounds that include both an indigenous and multicultural population and a multi age class of students from Croxton Special School.

Students have an option of pedagogical approaches with both the Mainstream and Steiner stream available. Teaching and learning in both streams is based on the AUSVELS curriculum, with the school transitioning to the Victorian Curriculum by 2017.

Attendance and transition programs are an ongoing focus. Our specialist programs include Art, Craft, Physical Education, Music, Instrumental Music, Eurythmy, Orchestra, indigenous language and cultural studies.

The school has 310 students and is serviced by our Principal class, teachers and Education Support staff. Our school continues to focus on working together to benefit all children in our school. As an entire school community we strive to live out our school values on a daily basis – Respect, Trust, Caring, Doing Your Best and Responsibility.

Achievement

Our NAPLAN data at Year 3 and Year 5 indicate we are generally performing at a similar level to other schools in most areas and slightly lower in Numeracy.

A whole school focus on participating in Powerful Learning Professional Development is working towards delivering higher quality and less variable instructional practices across the school. This is supported by weekly team planning sessions, coaching, peer observations and feedback.

To support learning and increasing our level of achievement, all indigenous students will have a Koorie Education Learning Plan (KELP) and students significantly below expected levels or those with additional needs will have Individual Education Plans (IEP).

Engagement

Our student attendance results are similar to those from the previous 12 months and consistent with those averaged out over 4 years. They are lower than the average attendance rates across the State.

We continue to promote attendance at school and celebrate the classes with the best attendance figures.

A new late pass system is also being introduced at the front office that will improve both accuracy in collecting punctuality data and increase the level of awareness that getting to school on time and attending regularly has a huge impact on student learning outcomes.

Wellbeing

Year 5 and 6 students participate in the student Attitudes to School Survey each year. This includes questions about students' sense of belonging and enjoyment of school. Our results for 2015 show our students' connection to school and their perception of safety are similar to other schools in the State.

Our school is participating in the School Wide Positive Behaviours Program in collaboration with other schools around the State to improve both our school safety and our students' connection to the school.

As a school we are committed to continually increase student voice, differentiation, goal setting and feedback in order to improve all students' academic and well-being outcomes.

Productivity

A combination of both graduate and experienced teachers continue to build a culture of high expectations, with shared learning, professional conversations and peer observations as part of their professional growth. All staff Professional Development Plans (teachers and Principal Class) connect directly to the AIP and the Strategic plan and performance is monitored, supported and feedback opportunities are a vital part of improving our overall performance.

Outcomes in the Staff Opinion survey are slightly lower than the state median, however they are also slightly improved when compared to 12 months earlier.

Performance Summary

The Government School Performance Summary provides an overview of how this school is contributing to the objectives of the Education State and how it compares to other Victorian government schools.

All schools work in partnership with their school community to improve outcomes for children and young people. Sharing this information with parents and the wider school community will help to deliver community engagement in student learning in the school, which is a State-wide priority of the Framework for Improving Student Outcomes.

Key: Range of results for the middle 60 % of Victorian government primary year levels: Result for this school: Median of all Victorian government primary year levels:

School Profile

Enrolment Profile

A total of 325 students were enrolled at this school in 2015, 159 female and 166 male. There were 4% of EAL (English as an Additional Language) students and 9% ATSI (Aboriginal and Torres Strait Islander) students.

Overall Socio-Economic Profile

Based on the school's Student Family Occupation index which takes into account parents' occupations.

Parent Satisfaction Summary

Average level of parent satisfaction with the school, as derived from the annual *Parent Opinion* survey. The score is reported on a scale of 1 to 7, where 7 is the highest possible score.

School Staff Survey

Measures the percent endorsement by staff on school climate derived from the annual *School Staff survey*. The percent endorsement indicates the percent of positive responses (agree or strongly agree) on school climate from staff at the school.

Data are suppressed for schools with fewer than three respondents to the survey for confidentiality reasons.

How to read the Performance Summary

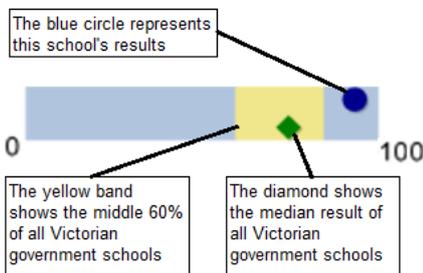

What are student outcomes?

Student outcomes show the achievements of students in this school in English and Mathematics. They also show results in national literacy and numeracy tests and, for secondary colleges, the Victorian Certificate of Education (VCE) examinations. They provide important information about student attendance and engagement at school.

For secondary colleges, the Performance Summary also provides information about how many students at this school go on to further studies or full-time work after leaving school.

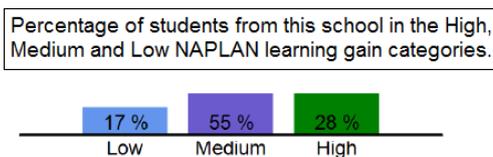

You can see these results for the latest year, as well as the average of the last four years (where available).

The Performance Summary also allows you to compare student outcomes for students at this school with the outcomes of students in all other Victorian government schools.

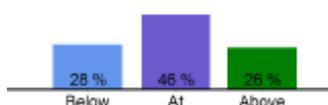

Additionally, NAPLAN learning gain charts are provided for each of the NAPLAN domains. These compare a student's current year NAPLAN result to the results of all 'similar' Victorian students (i.e. students in all sectors in the same year level who had the same NAPLAN score two years prior).

If the current year result is in the top 25% their gain level is categorised as 'High', the middle 50% is categorised as 'Medium' and the bottom 25% is categorised as 'Low'.

Results for students working within Towards Foundation Level AusVELS (AusVELS A-D) show the percentages of these students making progress below, at and above the expectations of their schools.

What is a School Comparison?

The *School comparison* is a way of comparing school performance that takes into account the different student intake characteristics of each school.

A *School comparison* takes into account the school's academic intake, the socio-economic background of students, the number of Aboriginal students, the number of non-English speaking and refugee students, the number of students with a disability, and the size and location of the school.

The *School comparison* measures show that most schools are doing well and are achieving results that are 'similar' to what we would estimate given the background characteristics of their students. Some schools are doing exceptionally well with the students they have, and have 'higher' performance. Some schools have 'lower' performance after taking into account their students' characteristics – these schools will receive targeted support to ensure that there is improvement.

Looking at both the student outcomes and school comparisons provides important information about what a school is doing well and the areas that require further improvement.

More information on school comparison performance measures can be found at:

<http://www.education.vic.gov.au/school/principals/management/pages/performreports.aspx>

What is the meaning of 'Data not available'?

For some schools, there are too few students to provide data. For other schools, there are no students at some levels, so school comparisons are not possible. Newly opened schools have only the latest year of data and no averages from previous years. The Department also recognises the unique circumstances of Specialist, Select Entry, English Language and Community Schools where school comparisons are not appropriate.

What is this school doing to improve?

All schools have a plan to improve outcomes for their students. The 'About Our School' statement provides a summary of this school's improvement plan.
